Education

Veermata Jijabai Technological Institute

Aug 2023 – Present

Bachelor of Technology in Electronics Engineering | CGPA: 9.18

Mumbai

Ramniranjan Jhunjhunwala College of Arts, Commerce and Science

June 2021 – March 2023

HSC Board | 88%

Mumbai

Sunshine English School

June 2010 – March 2021

SSC Board | 95%

Mumbai

Projects

Repo2Arch – GitHub to Architecture | FastAPI, Streamlit, NetworkX, PyVis, Supabase, Groq |

- Engineered **9-stage async FastAPI pipeline** (clone → AST analysis → NetworkX graph → Mermaid DSL → Groq LLM synthesis → Supabase persist) with **background task offloading**, delivering **sub-5s response** on cached repos.
- Automated architecture diagram generation via **Python AST + regex fingerprinting** across **20+ frameworks**, reducing manual codebase comprehension time by **~80%** for repos with **300+ files**.
- Integrated **3-model Groq fallback chain** with metadata-only prompting, cutting prompt token usage by **~70%** while generating summaries, improvement suggestions, and README overviews without exposing raw source code.

Multi-Agent Debate AI – Decision System | Groq, LLaMA-3, FAISS, SentenceTransformers, Streamlit |

- Engineered **8-agent LLM orchestration** on **Groq LLaMA-3.3-70B/3.1-8B** with JSON-mode outputs across **10-step pipeline** (Planner, 3 rounds, Critic, Fact-Checker, Judge) executing **24 API calls** per debate.
- Optimized inference cost **~60%** via **dual-model routing** with weighted scoring (R1=25%, R2=35%, R3=40%) and **FAISS RAG** using all-MiniLM-L6-v2 (384-dim) for **top-5 cosine similarity retrieval** across PDF/TXT evidence.
- Implemented **dual-layer FAISS memory** (0.75 similarity threshold, 100-debate auto-rotation) and **Streamlit analytics dashboard** with per-agent leaderboards, hallucination flags, and token usage charts.

AI Crypto Advisor – Portfolio Optimizer | LSTM, FinBERT, ChromaDB, Streamlit, TensorFlow, Gemini |

- Engineered multi-signal crypto advisory platform integrating **3-layer LSTM** (128→64→32 units) with **FinBERT sentiment** and **ChromaDB RAG**, achieving up to **95% test R²** and **72% 30-day trend accuracy** across 10 coins.
- Optimized real-time inference via **ThreadPoolExecutor** parallelizing LSTM prediction, FinBERT scoring (batch size 16), and GNews ingestion across **10 coins simultaneously**, cutting end-to-end latency by **~60%**.
- Designed **risk-weighted allocation engine** using softmax-normalized LSTM upside signals scaled by volatility exponent per risk tier, with **automated stop-loss alerts** and interactive Streamlit + Plotly dashboard.
- Deployed full-stack advisory app on **Hugging Face Spaces** via **Docker**, synthesizing LSTM forecasts, sentiment scores, and cosine-similarity RAG context into structured **Gemini 2.5 Flash** natural language reports.

Technical Skills

Languages: Python, C++, JavaScript, SQL

Frameworks & Libraries: ReactJS, Tailwind CSS, FastAPI, Streamlit, TensorFlow, Keras, Scikit-learn, Transformers

Databases: PostgreSQL, Supabase

Tools & Platforms: Git, GitHub, Docker, Render, Streamlit Cloud, Hugging Face

Problem Solving: Solved 400+ DSA problems (LeetCode)

Leadership / Extracurricular

Technovanza, VJTI

Aug 2024 – Dec 2024

Sponsorship Executive

- Reached out to potential sponsors, drafted **sponsorship decks**, and refined cold outreach strategies to secure funding for VJTI's **annual tech fest**.

Enthusia, VJTI

Aug 2024 – Feb 2025

Event Manager

- Organized **Kabaddi tournaments** and managed end-to-end **logistics and on-ground execution**, coordinating schedules, venues, and registrations for smooth match conduct.

Awards & Honors

- Siemens Scholarship Program** (Batch 11) – Selected among **top 300 students** from **7,000+ applicants** across India; awarded full academic sponsorship and industry mentorship.
