Education

Veermata Jijabai Technological Institute

Aug 2023 – Present

Bachelor of Technology in Electronics Engineering | CGPA: 9.18
Minor in Artificial Intelligence and Machine Learning

Mumbai

Experience

Chronis

June 2026 - Aug 2026

AIML Intern

- Built an **Event Understanding Engine** using LLMs that converts free-text personal events into schema-validated behavioral signals across 7 tracked variables, with a **JSON-schema retry loop** that fed validation errors back into the prompt to guarantee well-formed structured output.
- Designed a **calibration validation pipeline** that scored model confidence against blind human ground-truth ratings using **Mean Absolute Error**, across 160 human-rated event-variable pairs, under a pre-registered pass/fail protocol.
- Beat a naive fixed-confidence baseline by **27% lower average error** (0.405 vs. 0.556 MAE), proving the model's confidence scores were meaningfully calibrated rather than arbitrary.

Projects

AI Crypto Advisor – Portfolio Optimizer | *Python, LSTM, FinBERT, ChromaDB, Streamlit, Gemini* |

- Engineered multi-signal crypto advisory platform integrating **3-layer LSTM** with **FinBERT sentiment** and **ChromaDB RAG**, achieving up to **72% 30-day trend accuracy** across 10 coins.
- Optimized real-time inference by parallelizing LSTM prediction, FinBERT scoring (batch size 16), and GNews ingestion across **10 coins simultaneously**, cutting end-to-end latency.
- Designed **risk-weighted allocation engine** using LSTM upside signals scaled by volatility exponent per risk tier, with **automated stop-loss alerts** and interactive Streamlit + Plotly dashboard.
- Deployed full-stack advisory app on **Hugging Face Spaces** via **Docker**, synthesizing LSTM forecasts, sentiment scores, and cosine-similarity RAG context into structured **Gemini 2.5 Flash** natural language reports.

Multi-Agent AI – Decision System | *Python, Groq, PyPDF, FAISS, Streamlit* |

- Engineered **8-agent LLM orchestration** on **Groq gpt-oss-120b/qwen3.6-27b** with JSON-mode outputs across **10-step pipeline** executing **20 API calls** per debate.
- Optimized inference cost **~30%** via **dual-model routing** with weighted scoring (R1=25%, R2=35%, R3=40%) and **FAISS RAG** using all-MiniLM-L6-v2 (384-dim) for **top-5 cosine similarity retrieval** across PDF/TXT evidence.
- Implemented **dual-layer FAISS memory** (0.75 similarity threshold, 100-debate auto-rotation) and **Streamlit analytics dashboard** with per-agent leaderboards, hallucination flags, and token usage charts.

Technical Skills

Languages: Python, C++, JavaScript, SQL

Frameworks & Libraries: ReactJS, Tailwind CSS, FastAPI, Streamlit, TensorFlow, Keras, Scikit-learn, Transformers

Databases: PostgreSQL, Supabase

Tools & Platforms: Git, GitHub, Docker, Streamlit Cloud, Hugging Face

Problem Solving: Solved 400+ DSA problems (LeetCode)

Leadership / Extracurricular

Technovanza, VJTI

Aug 2024 – Dec 2024

Sponsorship Executive

- Reached out to potential sponsors, drafted **sponsorship decks**, and refined cold outreach strategies to secure funding for VJTI's annual tech fest.

Enthusia, VJTI

Aug 2024 – Feb 2025

Event Manager

- Organized **Kabaddi tournaments** and managed end-to-end **logistics and on-ground execution**, coordinating schedules, venues, and registrations for smooth match conduct.

Awards & Honors

- **Siemens Scholarship Program** (Batch 11) – Selected among **top 300 students** from **7,000+ applicants** across India; awarded full academic sponsorship and industry mentorship.
